Before restoration, AUM used to be an industrial site for ship repair.
Qabel ir-restawr, l-AUM kienet sit industrijali għat-tiswija tal-vapuri.

During the 1900's, the majority of Malta and Gozo's male population worked in the dockyard.
Fin-1900s, il-parti l-kbira tal-popolazzjoni maskili f'Malta u għawdex kienet taħdem it-Tarzna.

When a ship entered the dock for repairs, a scuba diver would go underwater to make sure the ship would align with the wooden support before the water was drained.

Meta vapur kien jidħol fid-dock għat-tiswija, scuba diver kien jinżel taħt l-ilma biex jiżgura li l-vapur joqgħod sewwa mal-appoġġ tal-injam qabel ma jitneħħa l-ilma mid-dock.
